

Fuel Line Clogging Failure

Customer Care Line: +27 87 945 1000
Email: info@komatsu.co.za

Description: When error codes, **CA428, CA559 and CA2249** occur, fuel line obstruction or contamination may be happening within the fuel line system and components.

Risk: Engine hard starting or low power / limited output, machine down time

Repair after breakage vs Proactive rectification

- ↑ Higher repair cost
- ↑ Longer time for parts
- ↑ Longer machine downtime

- ↑ More cost savings
- ↓ Planned parts delivery
- ↓ Shorter machine downtime

✓ Always use Komatsu **GENUINE** parts from your Distributor!
✓ Evaluate general machine health through PM Clinic and **Komatsu Oil Wear Analysis (KOWA)**
✓ **Contact Distributor** for proper inspection, issue diagnosis, troubleshooting, and countermeasure

Quick guide – Related component part numbers

- ✓ Every part number is unique and different for each machine model and type. **Avoid component mismatch!**
- ✓ For part numbers of other models, please **contact Komatsu South Africa** for proper part number identification.

Sustainability checkpoint

- ✓ Contaminated fuel should be drained properly and stored in correct containers to prohibit ground / groundwater contamination
- ✓ Removed components (filters / strainers) must be disposed off properly to correct disposal containers.
